ELD-63	Rubicon Trail
14N39	Richardson Lake Trail

Rubicon Ham Radio Frequencies

146.805 -.600 PL123.0

The KA6GWY repeater: covers the west slope of El Dorado County and the Sacramento area.

145.350 (repeater transmitter), odd split to

146.205 (repeater receiver), **PL123.0**

The Tahoe Basin KA6GWY repeater: linked 24/7 to the 805 ELD repeater: coverage in the Tahoe Basin.

146.805 simplex, no PL

This is the repeater output frequency of the KA6GWY repeater. Nice to have so that you can talk to your friends right in front of you, still listen to the repeater, but not tie it up when simplex will work just fine.

444.9875 +5.00 PL156.7

The Rubicon repeater located near Spider Lake, coverage on all of the Rubicon Trail except east of Barker Meadows OHV trail.

444.9875 +5.00 PL 107.2

Same as RUBI except that when using this PL it links to 805ELD and 805 TAH.

444.9875 simplex, PL107.2

This is the repeater output frequency of the Spider repeater. Nice to have so that you can talk to your friends right in front of you, still listen to the repeater, but not tie it up when simplex will work just fine.

Note: PL is used because some users decode PL on their handheld radios.

All ham frequency specifications from the Rubicon Trail Foundation (RTF) website:
